Corindus Vascular Robotics Receives Frost & Sullivan 2014 North American New Product Innovation Award in Interventional Cardiology

CorPath is first and only FDA-cleared robotic system for percutaneous coronary intervention (PCI)

Waltham, MA, June 26, 2014 – [Corindus Vascular Robotics](http://www.corindus.com), the leader in precision vascular robotics, has been named the recipient of the 2014 North American New Product Innovation Award in Interventional Cardiology. The award was established by growth partnership company Frost & Sullivan to recognize visionary innovation and product excellence. Corindus's CorPath Vascular Robotic System is the first medical device to bring robotic precision and accuracy to coronary angioplasty procedures, which may improve clinical outcomes while increasing radiation protection for interventional cardiologists.

"To achieve excellence in new product innovation leadership is not an easy task, but the CorPath system addresses a critical concern of interventional cardiologists, and has the potential to improve outcomes and economics in coronary angioplasty," noted Greg Caressi, senior vice president, Healthcare & Life Sciences, Frost & Sullivan. "Corindus's receipt of this award signifies a great accomplishment."

The CorPath System stood out from other products in the market with the following key differentiators:

- **Fulfilling Unmet Needs in Interventional Cardiology.** The CorPath System provides tremendous benefits that decrease key career-limiting issues that physicians tend to face as a result of radiation exposure.
- **Optimized Design Considerations for Cath Lab Use.** The CorPath System was designed to have the physician sitting in the Interventional Cockpit, removed from radiation, in a robotic control unit that sits beside the patient on the patient table bedrail.
- **Advancing Care and Safety.** The CorPath System can safely navigate through the vascular anatomy to perform balloon stenting techniques.
- **Innovative CorPath One Stent Program.** Corindus Vascular Robotics launched the "CorPath® One Stent Program" to highlight the precision and accuracy of the CorPath System by offering a \$1,000 credit to hospitals that use two or more stents per lesion in coronary angioplasties performed with CorPath.
- **Future Promise.** The CorPath System is believed to have a future in emerging interventional techniques and could be leveraged for procedures in other related fields.

Corindus CEO David Handler said, "We are committed to pioneering a positive change in the delivery of healthcare and making a significant difference for patients, physicians and hospitals.

Frost & Sullivan has validated that the direction we're moving in is the right one. On behalf of Corindus, we would like to express our thanks for this esteemed honor."

###

About Corindus Vascular Robotics

Corindus Vascular Robotics is the global technology leader in robotic-assisted percutaneous coronary interventions (PCIs). The company's FDA-cleared CorPath® 200 System is the first medical device that offers interventional cardiologists PCI procedure control from an interventional cockpit. With the CorPath System, Corindus brings robotic precision to PCI procedures to help optimize clinical outcomes and minimize the costs associated with complications through improper stent placement. Corindus stands behind its technology with a "One Stent Promise," offering a \$1,000 credit to hospitals that use two or more stents per lesion in PCI procedures performed with the CorPath System. About Frost & Sullivan

Frost & Sullivan, the Growth Partnership Company, enables clients to accelerate growth and achieve best-in-class positions in growth, innovation and leadership. The company's Growth Partnership Service provides the CEO and the CEO's Growth Team with disciplined research and best-practice models to drive the generation, evaluation and implementation of powerful growth strategies. Frost & Sullivan leverages more than 50 years of experience in partnering with Global 1000 companies, emerging businesses and the investment community from more than 40 offices on six continents. To join our Growth Partnership, please visit <http://www.frost.com>.
